

After your Home Performance with ENERGY STAR® assessment is complete, your program-approved contractor will recommend a variety of energy efficiency improvements for your home that may qualify for significant rebates.

| Measures  | INCENTIVE MAXIMUM AMOUNT            |   |
|---|-------------------------------------|---|
|   | Home Performance with ENERGY STAR®* | Assisted Home Performance with ENERGY STAR®** |
| Customer Cost for Assessment  | \$50                                | \$25  |
| <b>Weatherization Measures</b>  |                                     |   |
| Air Sealing 20% Improvement   | \$900                               | \$1,100                                       |
| Air Sealing 30% Improvement   | \$1,300                             | \$1,500                                       |
| Air Sealing 40% Improvement   | \$1,800                             | \$2,000                                       |
| Air Sealing/Heat Pump "Bundling Bonus" <sup>1</sup>   | \$300                               | \$350   |
| Duct Sealing 20% Improvement  | \$550                               | \$650   |
| Duct Sealing 40% Improvement  | \$700                               | \$850   |
| Add R-19 Attic Insulation   | \$900                               | \$1,100                                       |
| Add R-30 Attic Insulation   | \$1,100                             | \$1,400                                       |
| Knee Wall Insulation  | \$400                               | \$600   |
| Rim Joist Insulation  | \$200                               | \$250   |
| Foundation Wall Insulation  | \$650                               | \$800   |
| Floor Insulation  | \$650                               | \$800   |
| Crawlspace Encapsulation  | \$1,000                             | \$1,250                                       |
| Insulated Siding/Sheathing (min R-5, 50% of walls)  | \$1,200                             | \$1,500                                       |
| Wall Insulation (min 50% of walls)  | \$1,800                             | \$2,400                                       |
| <b>HVAC and Water Heating Measures</b>  |                                     |   |
| Heat Pumps Tier 1 (≥ 16 SEER2 and ≥ 11.7 EER2 and ≥ 7.8 HSPF2, Multi-stage Capacity)  | \$800                               | \$1,200                                       |
| Heat Pumps Tier 2 (≥ 17 SEER2 and ≥ 12.0 EER2 and ≥ 8.2 HSPF2, Multi-stage Capacity)  | \$1,600                             | \$2,200                                       |
| Mini-Split HP Tier 1 (≥ 17 SEER2 and ≥ 11.7 EER2 and ≥ 8.2 HSPF2)   | \$550                               | \$1,000                                       |
| Per Additional Indoor Unit - Tier 1 <sup>2</sup>  | \$350                               | \$600   |
| Mini-Split HP Tier 2 (≥ 20 SEER2 and ≥ 12.0 EER2 and ≥ 8.6 HSPF2)   | \$1,100                             | \$1,700                                       |
| Per Additional Indoor Unit - Tier 2 <sup>2</sup>  | \$550                               | \$900   |
| CAC Tier 1 (≥ 16 SEER2 and ≥ 11.7 EER2, Multi-Stage Capacity)   | \$650                               | \$1,000                                       |
| CAC Tier 2 (≥ 17 SEER2 and ≥ 12.0 EER2, Multi-Stage Capacity)   | \$1,250                             | \$1,750                                       |
| Furnace (96+AFUE, Multi-stage w/ECM Blower)   | \$750                               | \$1,100                                       |
| Boiler (90+AFUE, Modulating Control)  | \$850                               | \$1,200                                       |
| Condensing Boiler with On-Demand Hot Water (95+ AFUE)   | \$1,100                             | \$1,500                                       |
| Heat Pump Water Heater  | \$1,100                             | \$1,350                                       |
| Tankless Water Heater (Gas/Propane) (90+UEF)  | \$650                               | \$850   |
| Natural-draft Water Heater Removal <sup>3</sup>   | \$400                               | \$600   |
| ENERGY STAR® Certified Smart Thermostat <sup>4</sup>  | \$150                               | \$200   |
| Mechanical Ventilation Equipment (ERV/HRV/Continuous Exhaust) <sup>5</sup>  | \$400                               | \$600   |
| Whole-Home Dehumidifier (ENERGY STAR Certified)   | \$400                               | \$600   |
| Hybrid Heat Pump & Furnace System Tier 1 (≥ 16 SEER2 and ≥ 11.7 EER2 and ≥ 7.8 HSPF2, Multi-stage Capacity) and (95+AFUE, Multi-stage w/ECM Blower) | \$1,450                             | \$2,300                                       |
| Hybrid Heat Pump & Furnace System Tier 2 (≥ 17 SEER2 and ≥ 12.0 EER2 and ≥ 8.2 HSPF2, Multi-stage Capacity) and (96+AFUE, Multi-stage w/ECM Blower) | \$2,250                             | \$3,300                                       |

For more information, contact your program-approved contractor or visit [energizedelaware.org/homeperformance](https://energizedelaware.org/homeperformance).

\* The Home Performance Assessment (Audit) Incentive is capped at \$400. Home Performance Incentives for Weatherization, HVAC and Water Heating are capped at the incentive level indicated below or at 50% of the total installed cost; whichever is lower. Air Sealing and Duct Sealing Incentives are capped at the incentive level indicated below or at 75% of the total installed cost; whichever is lower.

\*\* The Assisted Home Performance Assessment (Audit) Incentive is capped at \$425. Assisted Home Performance Incentives for Weatherization, HVAC and Water Heating are capped at the incentive level indicated below or at 75% of the total installed cost; whichever is lower.

<sup>1</sup> "Bonus" incentive for bundling air sealing with heat pump technology (space conditioning or DHW). Air Sealing must take place within 3 months of equipment installation. Equipment must be rebate eligible. 20% CFM reduction required.

<sup>2</sup> Mini-split rebates are capped at \$4,000 per HPwES customer and \$5,500 per Assisted HPwES customer.

<sup>3</sup> Applicable upon completion of air sealing project OR when residence is below Building Airflow Standard (BAS) at time of energy assessment (audit). Must be replaced with power-vented, hybrid heat pump, or conventional electric system.

<sup>4</sup> Must be bundled with other measures.

<sup>5</sup> One rebate per home on total cost of applicable ventilation upgrades.
